NITIN KESHAVA HEGDE

Software Developer | Full Stack

Bengaluru, Karnataka | +91-7483414647 | nitinhegde06@zohomail.in | linkedin.com/in/nitin-hegde-12b062322 | github.com/Marcos-sf

SUMMARY

Full-stack Software Engineer specializing in production-grade backend systems (Java, Python, JavaScript) with applied AI/ML integration, REST APIs, and ML-backed prediction services (LSTM + XGBoost ensembles). Software developer trainee on production Frappe/ERPNext and React/Next.js projects. Oracle Generative AI Certified Professional. MCA graduate with a track record of shipping secure, production-deployed systems end to end.

SKILLS

Languages: Java, Python, JavaScript

Backend & Frameworks: Frappe Framework, ERPNext, Node.js, Express.js, REST APIs, FastAPI (basics), JWT

Frontend: React, Next.js, Vue.js, HTML, CSS, Tailwind CSS

Databases: MySQL, MongoDB

Cloud & DevOps: Git & GitHub Actions, Amazon Web Services (S3, EC2, Bedrock), Docker

Automation & AI Tooling: Claude Console, n8n

EXPERIENCE

Software Developer Trainee — Wezake Tech LLP *Aug 2026 – Present*

Learning Management System (EZPZ TMS/LMS) — *Frappe Framework, Python, Vue.js*

- Build and test features for a live TMS/LMS product, with Python backend logic and a Vue.js frontend, replicating the production stack locally.
- Develop an Assessment module enabling timed quizzes — including question flow with a live countdown timer, submission handling, and auto-scoring — within the Frappe/ERPNext LMS.

WordDoc — *React, Next.js, AWS Bedrock*

- Build the frontend of a platform where medical students discover suitable journals and publish their work.
- Develop the React and Next.js interface for the platform's 7 tools, 5 of them AI-powered.

Full Stack Developer Intern — Svarks Technologies *Nov 2024 – Jan 2025*

- Owned end-to-end delivery of 10+ RESTful APIs (Node.js/Express) for a client-facing e-commerce app with a React frontend.
- Optimized MySQL schemas and queries through indexing and refactoring to improve read performance.

PROJECTS

Agriculture Equipment Rental System — *MERN Stack, REST APIs, MongoDB Geospatial Queries*
github.com/Marcos-sf/agri-rental | Live: agri-rentalpied.vercel.app

- Built a full-stack rental marketplace with 19 REST endpoints across auth, listings, and bookings, secured via JWT and Google OAuth with Cloudinary image uploads.
- Implemented proximity-based equipment discovery using MongoDB 2dsphere geospatial indexing and booking logic with date-range overlap validation to prevent double-booking.

Crop Price Prediction System — *Python, FastAPI, TensorFlow, XGBoost, ML*
github.com/Marcos-sf/crop-price-predictor

- Engineered a two-model ensemble (XGBoost + LSTM) for crop price forecasting across Karnataka mandis, served via a FastAPI service supporting multi-step forecasting up to 12 months ahead.
- Sourced and engineered features from 5+ years of historical AgmarkNet price data across six Karnataka markets, focusing on arecanut and coconut commodities to support 1, 3, 6, and 12-month forecast horizons.

EDUCATION

Master of Computer Applications (MCA), Bangalore Institute of Technology *2023 – 2025*
CGPA: 9.19 | Coursework: Data Structures, Algorithms, OS, DBMS, Software Engineering

Bachelor of Computer Applications (BCA), JSS SMI UG & PG Studies *2020 – 2023*
CGPA: 8.66 | Coursework: Java Programming, Databases, Web Technologies
